

Holly provides many quality products, including:

- Gates
- Valves
- Dust Hoppers
- Scale Hoppers
- Spouts
- Transitions
- Inspection Boxes
- Ladders and Cages
- Proximity Sensor Enclosures

Our capabilities include:

- Custom Design and Fabrication
- Laser and Water Jet Cutting
- Full CNC Machine Shop
- Full Drafting Department
- Full Line Job Shop

We look forward to discussing your specific needs, as well as industry-first innovations brought to market by Holly Products.

Gates

A robust design, proven reliability, and ease of maintenance—all in a product designed to meet a broad range of production environments and budgets.

- Internally-mounted air cylinder
- Front access door
- Front relief for product buildup

Valves

Holly's True Flow Flipper System provides a worry-free design that has been proven since the late 1980's. An internal rod seal assures product separation, and a side access panel allows the inline removal and replacement of the flipper to reduce down time.
