

GET TO KNOW OUR GATE!

INFO.

A robust design, proven reliability, and ease of maintenance. Designed to meet a broad range of production environments and budgets.

PRODUCT ACCUMULATION RELIEF

No longer do you have to worry about the gate slide plate getting stuck open due to product.

UPPER GUIDE

The standard Upper Guide uses UHMW.
Longer lasting options are available:
UHMW TITANIUM • AR PLATE • TILE LINED

TOP COVER

The Top Cover allows access to easily replace the slide plate or maintenance components.

SENSOR ENCLOSURE

Designed by IDFI, our Sensor Enclosure protects the Sensor, provides quick conduit connection, and easy sensor replacement.

LOWER GUIDES

The standard Lower Guide uses Sealed Race Bearings. More robust options are available:

- CAM FOLLOWERS (CARBON)
- CAM FOLLOWERS (CORROSION RESISTANT)

SWAPPABLE REAR FRAME DOOR

Allows you to swap slide-plate drive units without changing your gate frame.
Slide Plate drive unit options:

MANUAL • ELECTRIC • AIR • HYDRAULIC

FRONT ACCESS DOOR

Allows you to directly see how the flow of the gate is being effected, along with easy access to the Slide Plate Mounting.
