

# GET TO KNOW OUR TRUE FLOW VALVE!

K, Y, & 3-Way True Flow valve options

**INFO.**

IDFI's Holly True Flow System provides a worry-free design that has been proven since the late 1980's. An internal rod seal assures product separation. The side access panel allows the inline removal & replacement of the flipper to reduce down time.

## FLIPPER

Standard 50° slope, Flipper and Discharge Leg prevents product from slowing through the True Flow valve

## OPTIONAL INTERNAL LINING

Without changing the True Flow valve body, the internal Lining can be upgraded between multiple materials.

Urethane • AR Plate • Ceramic Tile

## ACCESS COVER

Easy to remove cover, making maintenance and access to the Internal Lining a breeze.

## FLIPPER DOOR

The Flipper Door allows easy access to the flipper for maintenance without removing the True Flow valve from service.

## DRIVE OPTIONS

The Torque Pin Mount allows multiple drive options.

AIR • ELECTRIC • MANUAL • HYDRAULIC

## DISCHARGE LEG FLANGE

The 45° Standard outlet with optional wedge, to change the discharge leg degree.

## SHAFT SEAL

The Lower Shaft Seal prevents product contamination
